Labcold Cubed Ice Makers

Labcold Cube Ice Maker LITV-NDP20

Produces pure, crystal clear cylindrical 30g ice nuggets from simple tap water which have the advantage of being slower to melt than conventional ice cubes.

Although this ice maker uses an innovative and clever spray system, using flexible nozzles to avoid scale or time build-up it is recommended that a hard water filter is used to prevent the build up of limescale.

Specifications

Product Code	LITV-NDP20
Style	Free standing
UK Warranty	1 Year
External Dimensions (mm) HxWxD	593 x 350 x 475
Net Weight	55kg
External Material	Stainless Steel
Ice Storage	6Kg
Daily Ice Production	23Kg

Specifications (cont.)

Automatic Production	Yes
Feet	N/A
Water Use (litres per hour)	3.41
Power Consumption Kwh/24hrs	28.2
Ambient Operating Temperature	16°C to 32°C
Eco Friendly Refrigerant	Yes

Features

- 23kg daily ice production
- Automatic production
- Stainless steel exterior
- Air cooled
- 6kg storage capacity
- Integral storage bin
- Space efficient
- Eco friendly refrigerant
