

NE5 Series Shaking Water Baths

Clifton Range®

The **Clifton NE5-D series of shaking water baths**, feature precision PID control, allowing observation of set and actual temperature simultaneously. A broad range of accessory flask clips and racks ensures flexibility for routine and specialised work.

NE5-D features bold LED display of measured temperatures in real-time, increments of $\pm 0.1^{\circ}\text{C}$, using precision PID temperature control. NE5-28DT has a built in timer, settings variable, 00:01 to 99:59 [hh:mm] which activates at set temperature. Settings retained even after turning the unit off.

NE5-28 Clifton shaking water bath, features analogue temperature and shaking speed control.

All models feature a high quality corrosion resistant stainless steel tank, with a bright clean finish housed in a durable painted outer case. Painted surfaces feature anti-bacterial finish with good chemical resistance.
